

RGANIPAKS

SUSTAINABLE SOLUTIONS FOR A GREENER FUTURE

We envision a world where eco-friendly packaging is not just an option but the standard. We aim to lead this change by providing innovative, accessible, and affordable biodegradable packaging solutions that support both the environment and our communities

ABOUT US

At Organipacks, sustainability meets innovation. Based in Indore, we are on a mission to transform the packaging industry with our 100% biodegradable alternatives to conventional plastics. We envision a future where each package contributes to protecting our planet.

OUR VISION

Organipacks is committed to sustainable packaging solutions that decompose within 180 days, compared to traditional plastics that can persist for centuries. Our eco-friendly products, made from renewable materials, are non-toxic and enhance soil health without leaving harmful residues. This not only reduces landfill waste but also supports agricultural productivity, offering cost savings and enhancing brand reputation for businesses that choose our packaging.

OUR COMMITMENT

INNOVATION

Continuously advance in developing materials that set new benchmarks for sustainability and performance.

EDUCATION

Raise awareness about sustainable practices and the benefits of switching to biodegradable packaging.

QUALITY

Ensure our products meet rigorous standards of durability and decomposability, delivering satisfaction without compromise.

EXPANSION

Grow our presence to make biodegradable packaging accessible nationwide and, eventually, globally.

COMPOSTABLE BIOPLASTIC

Compostable bioplastics are eco-friendly material, usually derived from renewable materials like corn, potato, and tapioca starches, cellulose, soy protein, lactic acid etc. or other biodegradable material. They are non-toxic and decompose

Not Regular Plastic

Compostable in 60 To 180 Days

Approved by CPCB

Food for Plant Once Composted

Flexible & Leak Proof

Different Sizes, Thickness & Color Available

Not Under Plastic Ban

Eco Friendly

According to the United Nations, only about 9% of plastic ever produced has been recycled, with the rest ending up in landfills or the natural environment, leading to severe pollution and health issues.

WHY CHOOSE COMPOSTABLE?

- Reduces Waste
- Lowers Carbon Footprint
- Looks and functions like regular plastic
- Encourages Sustainable Practices
- Enhances Brand Image
- Improves Soil Health
- Safe For The Environment
- Cost Effective in The Long Run

TRADITIONAL PLASTIC FLOWCHART

PLASTIC POLYTHENE

TAKES UP TO 1,000 YEARS TO DECOMPOSE.

RELEASES HARMFUL CHEMICALS INTO SOIL AND WATER.

NEGATIVELY IMPACTS OUR HEALTH

COMPOSTABLE POLYTHENE

DECOMPOSES WITHIN 180 DAYS IN INDUSTRIAL FACILITIES.

MADE FROM NATURAL MATERIALS, REDUCING CHEMICAL RELEASE.

URNS INTO COMPOST FOR THE SOIL

CARRY BAGS

Ideal for retail shopping, can easily replace traditional plastic bags.

PRINTED CARRY BAGS

Customizable with your business logo and available in a variety of colors, these bags are perfect for retail and enhance your brand's visibility

HIGH STRENGTH CARRY BAGS

Choose our High Strength Carry Bags—robust, eco-friendly, and biodegradable, perfect for heavy loads and sustainable shopping.

GARBAGE BAGS

Suitable for home or commercial use, help manage waste sustainably.

COURIER BAGS

They are nothing but a flexible packaging bag widely used for shipping. Some of the best features of courier plastic bags include tamper-proof, waterproof, POD jackets, and bubble pads.

GARMENT BAGS

Used for packaging a variety of products, ensuring they stay fresh.

GROCERY & COMPOSTABLE POUCHES

Store and sustain with our Grocery & Compostable Pouches, fully biodegradable for responsible packaging.

ANIMAL POOP BAG ROLLS

Manage pet waste with our Animal Poop Bag Rolls—strong, leak-proof, and fully biodegradable, ideal for pet owners.

BIO MEDICAL WASTE BAGS

Versatile for various packaging purposes, including wrapping food.

CUTLERY (SPOONS, FORKS & KNIVES)

Compostable cutlery for every meal- spoons, forks, and knives for eco-friendly dining.

PLA STRAWS

Sip sustainably with our PLA Straws, made from corn-based bioplastic, eco-friendly and fully biodegradable.

TRANSPARENT BAGS

Useful for visibility in packaging needs, maintaining an aesthetic while being eco-friendly.

FAQS

What materials are your bags made from?

Our bags are made from 100% compostable materials derived from renewable resources like cornstarch and other biodegradable biopolymers.

How long does it take for your bags to decompose?

Our bags decompose within 180 days in a composting environment, turning into carbon dioxide, water, and biomass..

How long does a compostable bag last in normal conditions?

It lasts for upto 1 year (after one year it starts losing its strength very slowly)..

Can the bags be customized with a logo?

Yes, we offer custom printing services to include your business logo or design on our bags to enhance your brand visibility.

What sizes and types of bags do you offer?

We provide a variety of bag types including grocery bags, garbage bags, and carry bags, available in multiple sizes to suit different needs..

Are the bags certified compostable?

Yes, our products are certified under CPCB, ensuring they meet strict compostability standards.

Can these bags handle heavy items without tearing?

Absolutely, our bags are designed to be both durable and robust, capable of handling heavy loads without tearing..

How should the bags be stored for maximum shelf life?

Store the bags in a cool, dry place away from direct sunlight to maintain their quality and durability until use.

Are your products safe for food contact?

Yes, our compostable bags are safe for food contact, making them ideal for grocery or food packaging.

What is the minimum order quantity for custom orders?

The minimum order quantity varies based on the type of bag and customization details. Please contact us for specific details.
